

March 4 and 5th, 2016
Southern Oregon Agricultural, Commercial and Industrial
Pesticide Collection Event
Registration Form for Waste Pesticides

Mail or e-mail (email preferred) registration to Clean Harbors Environmental Services by February 18th

Clean Harbors Environmental Services
26328 79th Avenue South
Kent, WA 98032
Attn.: Graham C Gadzia

Phone: 206-900-3930 (Clean Harbors)
e-mail: gadzia.graham@cleanharbors.com
Local phone: 541-690-9983 (Amy Patton)
email: pattonenv@gmail.com

This is a one-time, anonymous pesticide waste collection event for Farmers, and Agricultural, Commercial, Industrial and Institutional applicators located in Southern Oregon. The collection is scheduled for **Friday, March 4th, 2016 at the Redwood Transfer Station, 1381 Redwood Avenue in Grants Pass** and **Saturday, March 5th, 2016 at the Rogue Disposal Transfer Station, 8001 Table Rock Road in White City**. This event is sponsored by the Medford Water Commission, Oregon Health Authority, Oregon Departments of Agriculture and Environmental Quality, Jackson and Josephine Soil & Water Conservation Districts, Rogue Disposal and Recycling, Southern Oregon Sanitation Inc. Oregon State University Extension Service, Rogue River Watershed Council, Patton Environmental LLC and Clean Harbors Environmental Services.

Prior to bringing waste to the Pesticide Collection Event, you must complete this registration and return it to Clean Harbors by **February 18st**. Please be certain your waste inventory sheet is complete; any pesticides not included on the inventory sheet may not be eligible for disposal on the day of collection. **If you have any questions or concerns about the event logistics or pesticide identification, please contact Graham Gadzia with Clean Harbors at (206)-900-3930 or gadzia.graham@cleanharbors.com. If you have questions about containment of spilled or leaking materials, please contact Amy Patton of Patton Environmental LLC at 541-690-9983 or pattonenv@gmail.com.**

PLEASE INDICATE WHICH DATE AND LOCATION YOU PREFER:

_____ **Grants Pass, March 4, 2016** or _____ **White City, March 5, 2016**

1. Generator Information – ALL INFORMATION PROVIDED BELOW IS SOLELY TO ENSURE SAFE AND EFFECTIVE COLLECTION AND WILL BE KEPT CONFIDENTIAL.

()	()	
_____ Contact Person (First and Last Name)	_____ Telephone Number	_____ Fax Number
_____ Email Address (if preferred as contact method)		
_____ Other means of contacting you		
_____ City	_____ State	_____ Zip Code

WE MUST HAVE A WAY TO CONTACT YOU BEFORE THE EVENT. YOU WILL BE NOTIFIED OF A SCHEDULED TIME FOR YOU TO REPORT TO THE COLLECTION SITE AND YOUR CONFIDENTIAL IDENTIFICATION NUMBER.

2. Inventory of wastes you want to dispose of at this collection event

Please complete the waste inventory sheet on the following page to list the wastes you will bring to the collection event. Make additional copies of the inventory sheet if needed. Return the completed inventory sheet(s) with this application. Instructions for completing the waste inventory sheet are on the back side of the form. Only wastes that have been pre-registered and approved by Clean Harbors Environmental Services will be accepted at the collection event. **Radioactive materials, explosives, infectious medical wastes, certain poisons, and very reactive wastes are not accepted at these events. There is no quantity limit for collection of waste pesticides.** Please provide adequate containment (e.g., place inside larger container) for leaking or degraded containers prior to transporting pesticide waste to the event.

Unknown pesticides are accepted, but please describe the quantities and the physical state of the waste (liquid, solid, gas) on the registration form.

If you have trouble identifying the active ingredients in the pesticides you wish to dispose, please contact **Graham Gadzia with Clean Harbors at (206)-900-3930 or gadzia.graham@cleanharbors.com** for technical assistance.

Instructions for Completing Waste Inventory Sheet

1. **Source:** Please indicate whether the pesticides you plan to dispose come from an active farm, a commercial, industrial, or institutional applicator, or other operation.
2. **Item Number:** Number each item (or category group of items) you want to dispose at the collection event. Each item should have an individual number on its container as reference. The container number should correspond to the completed inventory sheet(s) submitted.
3. **Waste Description:** Describe, in as much detail as possible, wastes that you want to dispose at the collection event. The description should include the chemical and trade name, how you use the material, physical state (i.e., liquid, solid, sludge, gas), chemical characteristics (e.g., flammable/ignitable), and chemical constituents and percentages from the label or material safety data sheet (MSDS). For pesticides (e.g., herbicides, fungicides, rodenticides, etc.), please include the EPA registration number if available, trade name and percent concentration. When listing waste quantities, be as accurate as possible. **DO NOT** include wastes you do not want to dispose of at the collection event. Please avoid mixing your wastes together. If you do not know what type of material you have, contact Clean Harbors for assistance.
4. **EPA or USDA Number:** For pesticides (e.g., herbicides, fungicides, rodenticides, etc.), please include the EPA registration number or USDA number, *if available*, trade name and percent concentration.
5. **Quantity:** List the quantity of waste you want to dispose at the collection event. As a rule, list liquids in gallons and solids in pounds. Please indicate the amount of product the container would potentially hold under container size and the amount that is remaining in the container under estimated quantity. **Example:** A 5-gallon bucket with one gallon of liquid remaining the container, please list 5 gallons under container size and 1 gal under estimated quantity. Most liquid pesticide containers are 2.5 gallons.

Once **Graham Gadzia**, with **Clean Harbors Environmental Services** has received your registration application it will be reviewed for approval. You will receive a telephone call from Clean Harbors acknowledging acceptance of your application. The acknowledgment call will provide you with an appointment time for bringing in your waste, and any changes to the collection event site. It may take several days before you receive your call.

TRANSPORT TIPS

No safety precautions and protective measures can be suggested that totally eliminate risks. However, here are some suggestions that may assist you in minimizing exposure as you work with waste pesticides.

**IF YOU HAVE A SPILL:
CALL 1-800-OIL-TANK
1-800-645-8265
FOR EMERGENCY ASSISTANCE
HANDLING WASTE MATERIAL:**

1. Inspect containers. If, upon inspection, you have reason to suspect that the container will tear or rupture when moved, do not attempt to move or load the container for transport. Come to the collection site without it and we will provide assistance.
2. Wear the protective clothing and protective equipment (goggles, gloves, respirator, etc.) described on product labels when handling pesticides.
3. At a minimum, wear a long sleeved shirt buttoned at the wrist, a pair of chemical-resistant gloves, preferably a chemically resistant apron, rubber boots, goggles and a hat.
4. Have spill control materials available. For example, a 10-pound bag of commercially available safety absorbent, a shovel and a container for spilled material collected with the absorbent and contaminated soil may be useful in control and cleanup of a spill involving a small amount of material. Bring any spilled materials with you to the collection site for disposal.

FOR TRANSPORTING WASTE MATERIALS:

1. Inspect all pesticides to see that they are securely packaged. Only transport containers that are securely closed.
2. Line the storage area of the transport vehicle with plastic sheeting to contain any spillage that might occur and therefore simplify cleanup and decontamination.
3. Assure all labels are securely attached. This is important for disposal of these materials.
4. Arrange containers in your vehicle so that they are braced to prevent shifting which may result in container damage and/or leakage.
5. All containers should be kept dry during transport. Loads in open vehicles such as pick-up trucks should be covered in the event of rainfall.
6. Do not transport pesticide waste in a manner that will allow fumes from those wastes to enter the passenger compartment of the transportation vehicle.

DRIVE CAREFULLY. You are responsible for any spillage, damage, subsequent cleanup and restoration that might occur while you are transporting the wastes, whether the accident is your fault or other's. The State and its contractor are not responsible for any spillage that occurs before the contractor at the collection site accepts the waste.
